Introduction of speaker

- Wildfire Recovery Group
- **Rebuilding San Bernardino County** helping uninsured survivors
<http://www.rebuildsbcounty.org>
909-792-0255
- Laurie Delgado
- George Kehrer

Need to create an agenda for next week's meeting. I have created a questionnaire that might help get some answers from the group.

I got these ideas from Claudia which helped jump start my questionnaire.

1. How is planning department handling all the permits, are they slower, on time, what? Do you see the permit process moving along any faster?
2. What about the streets after all the trucks?
3. We are not seeing police in our areas and theft is happening on sites. Can we have more patrols in our areas?

Received one response to my email in which the person voiced their opinion about education of fire issues in the community. He blamed his neighbors and their lack of yard upkeep for spreading the fire more than it would've otherwise.

Education is important... we live with wildfires just as surely as some do with tornadoes and hurricanes. Education is the key to prevention
